

The Planets and the Solar System

Filesize: 7.54 MB

Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

(Robyn Nolan)

NAXOS AUDIOBOOKS, United Kingdom, 2014. CD-Audio. Book Condition: New. Unabridged. 142 x 124 mm. Language: English . Brand New. Living busily on Planet Earth, we rarely remember that we actually inhabit only a miniscule part of the universe. In The Planets and The Solar System, Jen Green paints the wider picture, and takes us on a journey across billions of kilometres in our galaxy, from our Sun to near and distant planets. Some, like Mercury, have a molten core surrounded with crust and spins quickly; Jupiter, on the other hand, is a big ball of gas. For 2,500 years, mathematicians and scientists from Pythagoras to Hubble have investigated our universe and found that the dimensions, the temperatures and the speeds (light years!) are unbelievably extreme. A fascinating introduction for younger listeners.
