This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

TODAY'S PERCEPTION OF A COLLEGE EDUCATION

GRIN Verlag Mrz 2013, 2013. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Scholarly Research Paper from the year 2011 in the subject Pedagogy - Higher Education, grade: 95%, Webster University (Sarasota), course: MKT5000, language: English, comment: College Education, Masters Degree , abstract: Because of a troubled economy that is showing no signs of improvement, the cost of a college education is experiencing questioning. Some may believe that it is a much better solution to take those four years and start working their way up because experience is key. Others claim that there are statistics to back that the earnings of a college graduate are substantially higher than one with a high school diploma. That putting in the work, and the investment will be worth it over time. However, with the economy showing no sign of improvement, along with a very low employment rate, the number of individuals with an undergraduate degree is becoming very over-saturated. The search for a job is becoming much more barbaric in attempt to start a life, and paying off the long-term debt associated with one's education. This survey, evaluates how important a college education is perceived in today's society. The participants have been both male and female from different ages, educational levels, income levels, and states. A total of 24 participants responded to this survey, however there was an expected goal of 50. The results that have been gathered may be shocking to some, and no surprise to others. 16 pp. Englisch.
