Northampton, Mass. of the continuous service order are built that way; they never throw anything away. But the old watt-hour meter may, with a few minutes rigging up, be made just as handy as anything in the plant, to indicate the rise or fall of voltage beyond certain limits, either supplementing or taking the place of an automatic regulator. Especially is this desirable in plants where the engineer is frequently called out of the engine room or away from the switchboard, and in small plants operated at times by one man, or where the load is subject to large variations compared with the capacity of the generators. The contact making voltmeter suggested in the sketch can be set to indicate a variation of two volts above or below normal--quite a surprise to...
