Special Interest Model Books. Paperback. Book Condition: new. BRAND NEW, Bearings, Alex Weiss, Alex Weiss, Every working model includes bearings, often a large number of them. This practical book describes the wide and diverse range of bearings found in the large variety of different types of models built in home workshops. It reviews the choice of bearings materials, the type of bearing to use for each particular application and highlights the differences between home-made and off-the-shelf bearings. It also considers the installation and care of bearings. Furthermore, it covers several full-size applications undertaken by model engineers, such as clock making and machine tool maintenance, which also call for some knowledge of bearings. It is now over forty years since Ian Bradley and Norman Hallows published the slim MAP volume Bearing Design and Fitting and much has changed in the bearing field since that date. This book provides a welcome addition to the Workshop Practice Series of books and will be welcomed by all model engineers, whatever their area of interest.
